**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Hi. I'm a subscriber to an independent internet provider which is not that fast but has been a reliable low cost way to keep my own private server online for the past 15 years. It provides web pages, an FTP site, and security camera access.

I understand there is a petition, that if granted, would allow incumbent providers to escape their obligations under Section 251 of the Communications Act which require them to provide wholesale access to unbundled network elements.

I would no longer be able to keep the low cost connection alive for the server, and would need to purchase online space at a much greater cost which would not work with my current security system. It would be greatly missed.

Companies like ATT & Comcast, have higher speeds but at a higher cost, don't offer static IP's and are not as available in rural areas.

Please keep UNE's available.
